

DIA14242 Fare Policy

We calculate the fare as follows –

Total Fare = Fixed Amount + Per Km Amount + Time taken in traffic + Waiting charge if any at the time of providing the estimated fare, GPS KM are taken based on the pickup point and destination and base fare is added to the same. Waiting charges + time taken in traffic are not taken into account at this time.

Your Final Fare may differ from the estimated fare to the tune of waiting charges and time taken in traffic, but there will not be more than 10% variation in these 2 fares, unless the route is changed by the customer.
